## Story of Diet

---

In February 2009, Symphony broke the monotony of ubiquitous box shaped coolers with the introduction of unique Tower Shaped coolers. This unique Tower Shaped coolers took the market by storm in no time. We named this range of tower shaped coolers as Diet Range.

Diet range became extremely popular within a very short span of time. Although nobody could manufacture or introduce tower shaped coolers till 2016, still many lookalikes started mushrooming in the market. Since we started manufacturing in 2009, Symphony have sold almost 18 lakhs Diet Series Coolers till March 2019.

Because of high and world class quality, maintained since inception by the Company, the Diet range of air coolers has attained enviable reputation and goodwill amongst the buyers. In course of time, people have started correlating and identifying distinguishable tower shape with Symphony.

Therefore, it is duty of the Company to draw attention of its valued customer that they may not sway away by similar looking air coolers. The company has received such complaint that the buyers have associated the shape and pattern with the company and therefore, when they found similar shape by the air cooler considering the same as of the Symphony.
